EDUCATION

University of California, Berkeley

Expected Dec 2026

Dual B.A., Economics and Data Science

Relevant Coursework: Data Structures (CS 61B), Structure and Interpretation of Computer Programs (CS 61A), Artificial Intelligence (CS 188), Data Science (Data C100), Probability (Data C140), Linear Algebra (Math 56)

WORK EXPERIENCE

breakouts.trade

Feb 2025 – Present

Founder & Engineer

- **Web product:** Built a browser drill app for breakout patterns and a daily scanner on the same strategy code as the repositories' only contributor: 458 signups, ~240 activated users, 10,203 practice drills.
- **Engineering quality:** Wrote 22 hand-written SQL migrations, 1,036 lines, gated every pull request on type-check, lint, tests and build, and fixed and re-verified a pre-auth account-takeover flaw found reviewing all 67 route handlers.
- **Live trading robot:** Shipped an IBKR robot that has traded real money since June 2026 under systemd, with a kill switch, five-minute broker reconciliation and a survivorship-free backtest of 66,753 trades behind the strategy.

North Central Ohio Pollinator Pathway and Sustainable Delaware Ohio

Dec 2023 – Jul 2024

Full-Stack Developer

- **End-to-end delivery:** Built websites for two environmental nonprofits as the sole developer, handed both off in May 2024 and supported the owners through July.

necoTECH

May 2023 – Sep 2023

Data & Product Intern

- **Internal data tools:** Automated lead tracking in Python and cleaned proposal data, which consolidated CRM, proposal and marketing workflows across three teams.

PROJECTS

Build Your Own World

Nov 2024 – Dec 2024

Course project, CS 61B · Java

- **World generation:** Built the procedural world generator and the main menu for a three-person project.
- **Replay feature:** Added state management and a feature that replayed a saved game, and fixed a quit command that answered only one of its two spellings.

Startup-Idea Ranker

Aug 2026

Independent research

- **Leak battery:** Built a scoring harness across 58,873 company profiles from 2013 against 2024 outcomes, and voided a passing run when the battery caught the label encoded in the judge's input.

Incurra

Jul 2026 – Aug 2026

Founder

- **Kill criterion:** Built an LLM tool in Python, DuckDB, Parquet and the Anthropic API that read synthetic adjuster notes on commercial-auto claims, and closed it in August on a criterion written before the build.

TECHNICAL SKILLS

Languages and data: Python, SQL, TypeScript, JavaScript, Java (coursework), PostgreSQL, Supabase

Web and infrastructure: React, Next.js, REST, Vitest, pytest, Playwright, GitHub Actions, Linux, AWS (SES, boto3)

Eagle Scout: Led 100 volunteers on a community trail expansion (Oct 2023)
